

SPRING 2018 PLANT LIST – 05/27/18

MILES' TO GO - P.O. BOX 6 - CORTARO, AZ 85652 - 520-682-7272 - FAX 520-682-0480

EMAIL miles2g@aol.com - WEB SITE www.miles2go.com

INFORMATION POLICY: We do not share or sell our mailing or emailing information with anyone.

ORDERING INFORMATION

Shipping Charges: Please use chart below to calculate shipping charges for your order.

For orders under \$25 - add \$15.00 for shipping by Priority Mail

For orders from \$25 to \$49.99 - add \$10.00 for shipping by Priority Mail

For orders \$50 and over - free shipping by Priority Mail

Express Mail will be billed for the exact amount, contact us if you are paying by check or money order.

Catalog Number: Please include the catalog number which appears with each plant entry in order to speed up the processing of your order.

Email Orders: At the current time we do not have a secured server and do not recommend emailing credit card numbers. If we have your credit card number on file, email us your order and include just the last 4 digits and exp. date of your credit card as verification. You may email your order and we will hold it for you until we receive payment information (via phone, fax or mail) .

Fax Orders: You may fax your order to 520-682-0480 at any time.

Foreign Orders: We cannot ship outside the United States and her territories.

Minimum order: We have no minimum order but there is a shipping charge for some orders (See Shipping Charges.)

Payment: We accept checks, money orders, Discover, Mastercard, Visa, and American Express.

Paypal: We now accept Paypal payments.

1. Do not send paypal payments for your order until we confirm the total cost and availability of the items.

2. Once we have confirmed your total, you may make payment to miles2g@aol.com or you can request to be billed through Paypal.

Plant Size: Unless otherwise specified, the plants will fit into the pot size indicated.

Phone Orders: (520-682-7272) We try to be available for phone orders from noon-5pm Mon-Fri. We are often available more than that, but avoid calling before 7am or after 7pm.

Plant lists and mailings: We do 3 major updates of the web site per year and send out our plant lists at that time.

Processing Time: We try to pull the plants for your order within a day of receiving it and process and ship within a week. We ship on Monday and Tuesday so that the order will arrive in that week. If you do not receive your order within four weeks of sending it, please notify us -- the United States Postal Service is not infallible.

Sales Tax: For orders by Arizona residents or shipped to Arizona please add 6.1% for state sales tax.

ORDERING INFORMATION

Shipping Charges: Please use chart below to calculate shipping charges for your order.

For orders under \$25 - add \$10 for shipping by Priority Mail
For orders from \$25 to \$49.99 - add \$5 for shipping by Priority Mail
For orders \$50 and over - free shipping by Priority Mail
Express Mail will be billed for the exact amount, contact us if you are paying by check or money order.

Shipping and Weather: While we ship all year and pack the plants to protect them from some cold, we cannot guarantee that they will not be damaged from prolonged freezing temperatures. If you order during the winter months, take your weather conditions into consideration.

Postal Carrier Release allows the postal carrier to deliver a large parcel to your residence when they would not otherwise.

Substitutes: We do our best to provide the plants you order, but some quantities are limited. If you list substitutes we can select plants of equal or greater value; or if you prefer, we can give you credit toward your next order or a refund. If you are paying by credit card, you will be charged only for the plants that are available.

When Your Order Arrives: After bare-rooting your plants, we allow a day or so for the roots to heal before packing them. They will be ready to pot as soon as it is convenient for you. When you receive your order, unpack it immediately. If any plants are damaged, please notify us. (WARNING- Cacti and succulents are dangerous if treated improperly. Plants in the Euphorbiaceae and the Apocynaceae have irritating or toxic sap. Many of the succulents are armed with an array of spines, thorns, and other protective structures which can cause physical injury. The customer assumes all responsibility for handling our plants with care.)

A WORD ABOUT GRAFTED PLANTS

We produce all of our own grafts and are always trying to improve them. We prefer *Harrisia justbertii* & *Stenocereus griseus* for grafting cacti because they are long lived and have a longer growing season than many other species. There is no universal grafting stock, however, so we will be using other species that are found to be superior for specific applications. By grafting we can provide you with rare plants at a reasonable price.

CACTACEAE - CACTUS FAMILY

* = only advertised on the web site due to limited quantities

G-SG = grafted on *Stenocereus griseus* G-HJ = grafted on *Harrisia justbertii* RC = rooted cutting

ACANTHOCALYCIUM thionanthum - #9300 - 2¼"pot - \$5.00 - light green body with dense ½"-long straw-colored spines, shortly columnar body and light yellow flowers when mature

*A. violaceum - #5031.4 - 4"pot - \$9.00 - rounded light green body with short erect tan spines, light violet flower with spiny floral tube, flowering size

ANCISTROCACTUS uncinatus ssp. crassihamatus - #8198 - 2¼"pot - \$5.00 - chunky upright blue-green body, short heavy hooked red and yellow spines, red-brown flowers

*ARIOCARPUS. hybrid #1 - #8527 - 2¼"pot - \$6.00 - (A. retusus x A. agavoides)F2, variable seedlings - tubercles light to dark green, some yellowish, short and fat to long and thin, flowers almost white to purple

A. retusus ssp. retusus v. furfuraceus - #5098.2 - 2¼"pot - \$5.00 - from Las Tablas, when mature the fat gray tubercles of this form often grow to be as wide as they are long, occasionally wrinkled surface, white flowers sometimes with a blush of pink

A. retusus ssp. trigonus - #5102 - 2¼"pot - \$5.00 - long curved sharply pointed olive green tubercles, rosettes up to 8" wide, large lightly scented yellow flowers when mature

ASTROPHYTUM myriostigma NEW #9673 - 2¼"pot - \$5.00 - (N of Las Palomas, SLP, MX) from the habitat of Turbinicarpus jauernigii, 5-ribbed stem with fine dense white flecking, yellow flowers.

A. myriostigma "columnare" - #9635 - 2¼"pot - \$5.00 - rarely offered, upright thin stems bear many small yellow flowers along the ribs when mature

*A. myriostigma "nudum" - #5451 - 2¾"pot - \$5.00 - five ribs, dark green body with little or no flecking, yellow flowers

A. myriostigma "quadricostatum" - #7857 - 2¾"pot - \$5.00 - four ribs, dark green body, dense white flecking, yellow flowers

A. myriostigma 'tricostatum' - #7812 - ~1"seedling - \$6.00 - three ribs, dark green body, dense white flecking, yellow flowers

*A. myriostigma "strongylogonum" - #9446 - 3¼"pot - \$7.00 - nice clean 5-ribbed seedlings with dense fine flecking, can grow to fill a 6" pot

CHAMAECECEUS 'Fire Chief' - #5163 - 2¼"potRC - \$4.00 - rooted cuttings, stout light green stem, short light spines, 1"+ orange flowers

C. 'Kawinai' NEW - #7583 - 2¼"potRC - \$4.00 - rooted cuttings, thin green stems, short light spines, small bright yellow flowers

C. 'Japan No 1' NEW - #7593 - 2¼"potRC - \$4.00 - rooted cuttings, thick upright green stem, short erect tan spines, 1"+ orange flowers

*C. 'Lollipop' NEW - #8413 - 2¼"potRC - \$4.00 - rooted cuttings, thin green stems, dense brown tipped spines, bright red flowers

*C. 'Mr. Francis' - #9226 - 2¼"potRC - \$4.00 - rooted cuttings, ½"-wide light green stem, light spines, light yellow flowers

C. 'Rhinemaiden' NEW - #9227 - 2¼"potRC - \$4.00 - rooted cuttings, soft light green stem, dense light spines, dark red flowers

C. 'Ragged Robin' NEW - #8418 - 2¼"potRC - \$4.00 - rooted cuttings, green stems, dense light spines, red flowers

C. 'White Peanut' - #7592 - 2¼"pot - \$4.00 - rooted cuttings, thin green stems can be used for hanging baskets, white flowers

COPIAPOA hypogaea - #7653 - 2¼"pot - \$5.00 - low soft brown to olive body with thick taproot, short black spines, yellow flowers, flowering size

CORYPHANTHA greenwoodii NEW - #8542 - 2¼"pot - \$4.00 - round shiny green stem wrapped in dense heavy golden spines, yellow flower when mature

C. pussiliflora - #8834 - 2¾"pot - \$5.00 - (=C. pseudoechinus ssp. pseudoechinus) Sierra de la Paila, small-growing clustering stems, short erect yellow spines, many small pink flowers in summer

ECHINOCACTUS platyacanthus - #5471 - 3¼"pot - \$7.00 - largest species of barrel cactus, also slow-growing, seedlings with blue body and stout straight black spines

ECHINOCEREUS brandegeei - #8707 - 4"pot - \$9.00 - 1"-thick light green stems with dense erect flattened golden spines, bright pink flowers with red center in summer

E. dasyacanthus ssp. rectispinus NEW - #8437 - 2¼"pot - \$4.00 - solitary upright stem, short erect dark spines, 3" bright yellow flowers ages to orange

E. enneacanthus ssp. brevispinus SB291 - #9544 - 2¾"pot - \$5.00 - upright light green soft stems will form large clusters, tan to brown spines shorter than normal form, large bright purple-pink flowers when mature

E. knippelianus ssp. knippelianus - #5288 - 2¼"pot - \$4.00 - dwarf species with soft matte green stem, sparse erect tan spines, pink flowers borne around sides in spring

E. longisetus - #9545 - 3¼"pot - \$7.00 - upright green stems, long glassy white spines, large pink flowers, makes large clusters

E. pulchellus ssp. acanthosetus NEW - #8126 - ½"seedling - \$4.00 - miniature subspecies, flowering size, low soft green stem, soft white spines held close to stem, thick taproot, 1" dark purple flower, forms small clusters when mature

*E. reichenbachii ssp. armatus - #7849 - 3¼"pot - \$7.00 - upright solitary green stems with dense white and black radial spines, when mature develops long black central spines, up to 4" pink flowers

E. reichenbachii ssp. baileyi (Altus, OK) - #9328 - 2¾"pot - \$5.00 - upright green stems with dense orange-tipped white spines, large pink flowers with dark center

E. reichenbachii ssp. caespitosus HK1571 - #8530 - 2¾"pot - \$5.00 - small-growing, soft upright dark green stems with short black-tipped white spines, large pink flowers with dark center

E. reichenbachii ssp. perbellus (Crane Co., TX) - #9373 - 2¾"pot - \$5.00 - thin upright dark green stem, short black and white spines, large light pink flowers

E. rigidissimus ssp. rubispinus 'albiflorus' - #9616 - 2¼"pot - \$5.00 - solitary upright stem with dense spines held close to body, spines are white when young, brownish-orange when mature, flower is pure white

E. rusanthus v. vulpis-caudae - #5314 - 3¼"pot - \$7.00 - solitary upright dark green stem, erect red and white spines, rusty red flowers in spring

E. viridiflorus ssp. correllii - #8235 - 3¼"pot - \$7.00 - small upright green stem with dense short golden brown spines, greenish-yellow flowers in spring

E. weedinii - #9649 - 3¼"pot - \$7.00 - (Jeff Davis Mtns, TX) upright solitary dark green body, erect gold and white spines, yellow flowers in spring

For other species included in Echinopsis also see: Acanthocalycium, Lobivia, Soehrensia, Trichocereus

ECHINOPSIS ancistrophora v. kratochviliana - #9610 - 3¼"pot - \$7.00 - low shiny dark green body, large white flowers

*E. calorubra (red flowered) - #9078 - 3¼"pot - \$7.00 - shiny dark green body, short yellow spines, 4"+ dark red flowers

E. cardenasiana - #6806 - 3¼"pot - \$7.00 - low shiny green body, short curved dark-tipped spines, 2"-3" bright pink flowers

*E. 'Los Angeles' - #5488 - 2¾"pot - \$5.00 - large-growing dark green stems with minute black-tipped spines, 8"-long pink flower opens to 3"

E. 'Mellow Yellow' - #7713 - 2¼"potRC - \$4.00 - dark green body with short spines, heavily perfumed long light yellow flowers, clusters heavily

E. obrepanda - #9626 - 2¾"pot - \$5.00 - matte dark green body, short yellow spines, flowers 3½" long and wide, parents' flowers were dark pink but white-flowered offspring do occur

*E. Peach Flowered Hybrid - #7762 - 3¼"pot - \$7.00 - dark green stems with minute black spines, eventually forms clusters to 10" across, peach flowers are 5" long and 3" wide

EPITHELANTHA micromeris - #5496 - ¾"-1"plant - \$5.00 - low flattened body with dense minute white spines, self-fertile, small white flowers followed by small bright red fruit

ESCOBARIA missouriensis ssp. missouriensis - #5577 - 1"plant - \$4.00 - (= Neobesseya similis v. robustior) dwarf and fairly cold hardy, low stems with dark green tubercles, light colored spines, large yellow/pink flower and bright red fruit

E. tuberculosa - #8325 - 2¾"pot - \$5.00 - upright stem with dense white and gray spines, pinkish flowers

E. vivipara ssp. bisbeeana - #7560 - 3¼"pot - \$7.00 - from SE Arizona, 2"+ stems densely covered with dark-tipped white spines, large pink flowers, can cluster in time

FEROCACTUS glaucescens - #7049 - 2¾"pot - \$5.00 - blue-green body, heavy erect yellow spines

F. glaucescens 'inermis' - #7050 - 2¼"pot - \$5.00 - blue-green seedlings with single spine per areole, mostly spineless when mature

F. herrerae - #9501.3 - 3¼"pot - \$7.00 - & - #9501.4 - 4"pot - \$9.00 - (Guaymas, Sonora) distinctive dark green upright club-shaped stems become round when they mature, hooked brown spines

F. latispinus - #5499.2 - 2¾"pot - \$5.00 - shiny light green body with heavy sharp ribs, red and white spines, forms heavily hooked stout central spine, purple flower in winter when mature

F. robustus - #9571.3 - 3¼"pot - \$7.00 - (Cacaloapan, Puebla, MX) shiny dark green stem, red-brown spines, will cluster in time to 3' or more

F. viridescens v. orcuttii NEW (LIMIT 5) - #9674 - 2¼"pot - \$5.00 - (Valle de Las Palmas, Baja CA) shiny dark green body, stout red spines, greenish yellow flowers when mature

Gymnocactus - see Turbinicarpus

GYMNOCALYCIUM andrea - #8441 - 2¼"pot - \$4.00 - low soft dark green stems, minute white spines, large yellow flowers in summer

G. baldianum - #5505.2 - 2¾"pot - \$5.00 - & - *#5505.3 - 3¼"pot - \$7.00 - solitary low dark green stem, sparse white spines held close, large pink to red flowers spring to summer

G. bruchii - #5507 - 2¼"pot - \$4.00 - low clustering light green stems, short soft white spines, pink flowers in spring, hardy to 10F

G. cardenasianum - #6670 - 3¼"pot - \$7.00 - round gray-green body, long thick curved tan spines

G. freidrichii - #7091 - 2¾"pot - \$5.00 - low red/purple stem with white bands on ribs when young, short erect brown spines, lots of pink flowers in spring and summer

G. horridispinum - #7093 - 2¾"pot - \$5.00 - round green body, erect heavy tan to yellow spines, specimens can fill an 8" pot, pink flowers when mature

G. horstii - #7094 - 3¼"pot - \$7.00 - round green body, lightly covered with semi-erect tan spines, forms large cluster, pink flower, some scars on lower sides

G. neuhuberi - #8440 - 3¼"pot - \$7.00 - round shiny gray-green body, short tan to yellow spines, pink flowers

G. ragonesei NEW (LIMIT 5) - #6915 - 1"plant - \$4.00 - low brownish stem, short tan spines held flat against stem, white flowers

G. schatzlianum - #8213 - 2¾"pot - \$7.00 - low shiny dark gray-green body, short semi-erect white spines, light yellowish flowers

G. vatteri - #7725 - 2¼"pot - \$5.00 - slow-growing species, low gray-green stem, 1-3 short thick spines per areole, off-white flowers

Hamatocactus - see Ferocactus

HARRISIA justbertii - #6989 - 3¼"potRC - \$5.00 - good grafting stock, produces slower scion growth than *Steno. victoriensis* with more natural appearance, also nice large white flowers when grown as specimen

**LEUCHTENBERGIA principis* - #5517.3 - 3¼"pot - \$7.00 - odd species is technically a *Ferocactus*, long thin triangular tubercles with tan grass-like spines, large yellow flowers

LOBIVIA aurea 'Sierra Grandensis' - #8065 - 4"pot - \$9.00 - low shiny green stem, sparse erect tan spines, large yellow flowers in summer

L. draxleriana - #8436 - 3¼"pot - \$7.00 - low shiny dark green solitary body, short curved red and yellow spines, large dark red flowers borne from sides of the plants in summer

L. tiegeliana v. *dimorphypetala* - #9651 - 3¼"pot - \$7.00 - low shiny dark green body with short curved spines, dark purple-red flower, can cluster when mature

L. winteriana - #7236 - 2¾"pot - \$5.00 - egg-sized and egg-shaped green stem, short tan spines held against body, large shocking pink flowers in summer

MAMMILLARIA beneckeii - #8366 - 2¼"potRC - \$5.00 - rooted offsets, dark green body with short black and white spines, hooked central, large light orange flowers, an unusual color for this genus

M. bocasana 'rosieflora' - #5525 - 2¾"pot - \$5.00 - low light green body with dense white hairs and short tan hooked central spines, rings of pink flowers for months in the middle of the year

M. bombycina - #5526.3 - 3¼"pot - \$7.00 - this popular, large-growing species has dense white radial spines, red hooked central spines, rings of light pink flowers in the spring

M. camptotricha cv. *marnier-lapostollei* - #8434 - 3¼"pot - \$7.00 - low clustering dark green stems with long thin tubercles tipped with stiff curved yellow spines

M. dixanthocentron - #7274 - 3¼"pot - \$7.00 - solitary columnar light green stem, dense golden spines, paired central spines, rings of small peach flowers in spring

M. glassii v. nominis-dulcis - #7287 - 2¼"pot - \$4.00 - low clustering soft green stems covered with dense glassy white radial spines and short dark hooked centrals, light pink flowers

*M. grusonii - #5534.4 - 4"pot - \$9.00 - stout eventually shortly columnar stem to 10" tall, dense short erect white spines, rings of light yellowish flowers

M. hahniana - #5740.3 - 3¼"pot - \$7.00 - flattened green body covered with dense short white spines and white hairs, rings of pink flowers in spring

M. hernandezii - #7294 - 1"plant - \$6.00 - pretty uncommon dwarf species, small round stem from fat root, short tan spines held close to body, large bright pink flowers

M. longiflora fma. stampferi - #6916 - 2¼"pot - \$4.00 - dwarf round green stem, white and brown radial spines held close to body, short hooked central spines, large pink flowers, flowering size

M. marcosii - #8637 - 3¼"pot - \$7.00 - soft dark green body, dense white radial spines, chestnut-brown central spines, whitish flower, somewhat difficult

M. magnimamma "kramerii" - #8513 - 3¼"pot - \$7.00 - dark green body with thick tubercles, curved whitish spines with black tips, pinkish flowers, makes large clusters

M. melaleuca - #7315.2 - 3¼"pot - \$7.00 - thick dark green tubercles, black and white spines, large yellow flowers

M. melanocentra - #6836 - 2¾"pot - \$5.00 - flattened solitary matte green stem grows to 6" wide, large dark pink flowers in spring

M. mixtecensis - #9106 - 3¼"pot - \$7.00 - uncommon form of M. mystax, round dark green stem with black spines, central spines can grow to 1" long, rings of red flowers in spring

M. montensis - #5545 - 3¼"pot - \$7.00 - low green stem obscured with dense white radial spines and very long erect red-brown central spines, rings of pinkish flowers

M. mystax (yellowish spines) - #9555 - 6"pot - \$13.00 - stout round green stem covered with yellow to white spines with black tips, rings of dark pink flowers in spring

M. nejapensis - #6865 - 2¾"pot - \$5.00 - upright green stem, wooly axils with white hairs, long white spines tipped with black, small yellow flowers, branches dichotomously

M. pachycylindrica - #7326.3 - 3¼"pot - \$7.00 - stout shortly columnar dark green stem, dense purplish spines, brownish flowers, closely related to M. grusonii

M. perbella - #5548 - 2¾"pot - \$5.00 - low green stems cluster dichotomously, very short grayish spines, small pink flowers, forms hemispherical mound when mature

M. picta L1063 - #9653 - 2¼"pot - \$5.00 - dwarf dark green stem, short white and black spines, small yellow flowers, flowering size

M. schiedeana - #5555 - 2¾"pot - \$5.00 - low soft green body from thick taproot, dense soft short golden spines, light yellow flowers, forms low clump

M. sempervivi v. *tetracantha* - #5557 - 3¼"pot - \$7.00 - low dark green stem, 4-5 short brown spines per areole, rings of light pink flowers in spring

M. sonorensis 'Rio Yaqui Form' - #5540 - 3¼"pot - \$7.00 - (= *M. movensis*) low blue-green stems with short light colored spines, wooly axils and rings of pink flowers in spring, can form large cluster in time

M. sphaerica - #5559 - 3¼"pot - \$7.00 - low green stem from thick taproot, huge tubercles with thick yellow spines, large lemon-scented yellow flowers in summer

M. spinosissima - #5781 - 3¼"pot - \$7.00 - upright dark green body, dense red-tipped spines, rings of dark pink flowers in late winter

M. thornberi - #7901 - 2¼"pot - \$4.00 - (Picture Rocks, Pima Co., AZ) dark green finger-thick soft stems with dark spines, hooked centrals, large light pink flowers, forms loosely attached clusters

M. viridiflorus - #9589 - 2¼"pot - \$4.00 - (Chihuahua Pines Picnic Area, Santa Catalina Mtns.) solitary soft egg-shaped stem, dense gray and black spines, hooked central, light pink flowers with sharp petals

M. wrightii ssp. *wilcoxii* - #7364 - 1"+seedling - \$5.00 - Santa Rita Mtns, AZ, soft solitary body, somewhat shaggy white and brown spines, hooked central, huge pink flowers with sharply pointed petals, large green fruit, somewhat difficult

NEOPORTERIA *heinrichiana* v. *setosiflora* - #9457 - 2¼"pot - \$5.00 - from Totoralillo, Chile, round dark green body, erect brown spines when mature, bright yellow flowers on this line

N. huascensis - #8544 - 3¼"pot - \$7.00 - low shiny purple body, brown spines, reddish flower, (= *Eriocyste eriosyziodes* ssp. *atroviridis*)

N. napina v. *lembkei* - #9473 - 2¼"pot - \$5.00 - small club-shaped purplish body on thick taproot, many short brown spines close to the stem on short tubercles, light yellow flowers

N. senilis - #5578.3 - 3¼"pot - \$7.00 - round to shortly columnar purple-green stem, dense curved glassy white spines, bright pink tubular flowers in late winter

NOTOCACTUS *agnetae* - #7388 - 3¼"pot - \$7.00 - low green stem, soft curly tan spines, large yellow flowers in spring

N. buiningii - #5581 - 3¼"pot - \$7.00 - low gray-green stem, many sharp ribs, stiff yellow and brown spines, very large light yellow flower

N. leprosum - #8592.3 - 3¼"pot - \$7.00 - (= *Wigginsia leprosum*) shiny dark green body with sharp ribs, light-colored spines, light yellow flower with purple stigma

**N. schlosseri* - #5783 - 2¾"pot - \$5.00 - round green stem, erect red and white spines, yellow flowers with dark purple stigma when mature

N. warasii - #6923 - 3¼"pot - \$7.00 - upright shiny dark green stem with yellow spines, yellow flowers when mature, one of the largest in the genus

OPUNTIA *macrorhiza* - #8758 - 3¼"potRC - \$7.00 - red flower, green pads with spines at the tips, very cold hardy

O. polyacantha (Idaho, pink flower) - #8757 - 3¼"potRC - \$7.00 - pink flower, spiny green pads, very cold hardy

O. polyacantha (Utah, magenta flower) - #8786 - 3¼"potRC - \$7.00 - magenta flower, spiny green pads, very cold hardy

OREOCEREUS trollii - #5588 - 2¾"pot - \$5.00 - green body covered in dense white hair-like spines, stout brown central spines extend beyond the hair

For other species included in *Parodia* see: *Notocactus*

PARODIA mairanana - #7449 - 4"pot - \$9.00 - low dark green stem, short tan radial spines with darker central spines, small orange flowers

P. quechua - #7868 - 3¼"pot - \$7.00 - low dark green body, short spines, small dark red flowers

P. sanguiflora - #7454 - 3¼"pot - \$7.00 - low dark green stem, dense white radial spines, hooked brown central spines, large dark red flowers in early summer

PENIOCEREUS johnstonii - #9398 - 4"pot - \$9.00 - seedlings, olive green stems with sparse spines, flowers earlier in the year than *P. greggii*, eventually forms a large tuberous root, from Baja California

P. marianus - #6792 - 4"pot - \$9.00 - seedlings, faster growing than *P. greggii*, olive green stems with black spines, the flowers are white to light pink, forms large tuberous root, from Sonora, Mexico

P. viperinus - #8455.3 - 4"pot - \$9.00 - thin dark green stems with minute spines but tuberous root, salmon-red flowers in late spring when mature

For other species included in *Rebutia* also see: *Sulcorebutia*, *Weingartia*

REBUTIA pygmaea "rosalbiflora" FR1115 - #9504 - 2¾"pot - \$5.00 - small, egg-shaped green stems from thick taproot, minute white spines, large pinkish and white flowers in summer

R. minuscula ssp. *violaciflora* - #7485 - 3¼"pot - \$7.00 - low soft clustering light green stems with brittle white spines, large bright pink flowers

SOEHRENSIA korethroides - #9533 - 2¾"pot - \$5.00 - round green stem with stiff erect golden spines, grows to 6" across, 2"-3" red flowers with darker petal tips

STENOCACTUS (*Echinofossulocactus*) *coptonogonus* - #5684 - 2¾"pot - \$5.00 - low light green body, few thick sharp ribs, sparse stout spines, white and pink flowers in spring

S. phyllacanthus v. *violaciflorus* - #8780 - 2¼"pot - \$4.00 - round dark green body with very heavy wavy ribs, sparse short stout spines, pink flower with darker midstripe in spring

SULCOREBUTIA menesesii - #7769 - 3¼"pot - \$7.00 - low dark green body, dense flexible yellow spines, yellow flowers

TEPHROCACTUS weberi - #9326 - 2¾"potRC - \$5.00 - rooted cuttings, elongated green ½"-thick stems, fairly dense white spines, yellow flowers

T. zehnderi - #9648 - 2¼"potRC - \$5.00 - rooted cuttings, shiny green egg-shaped joints, fairly short white spines, large yellow flowers

THELOCACTUS bicolor ssp. bolaensis 'Summer Snow' - #9447 - 3¼"pot - \$7.00 - upright green stem, dense stout erect white spines, this line has almost pure white flowers instead of the typical bicolored flower

T. lausseri - #6774 - 2¾"pot - \$5.00 - rarely offered, reminiscent of T. bicolor but with small light pink flower, brown and white spines

T. setispinus ssp. setispinus - #5514 - 2¾"pot - \$5.00 - dark green stems with thin wavy ribs, thin tan spines, yellow flowers with red center in summer

TRICHOCEREUS chiloensis - #9548 - 2¾"pot - \$5.00 - Chile, upright matte green stems, fairly dense long stiff golden-brown spines

TURBINICARPUS booleanus - #9194 - 1½"-2"tall seedling - \$6.00 - thin stem topped with rounded head on top of thickened taproot, dense stiff black and white spines, pink flowers in late winter

T. dickisoniae - #5607 - ½"seedling - \$6.00 - miniature round stem becomes shortly columnar, dense white radial spines, thin long black central spines, whitish flower, flowering size

T. horripilus v. horripilus - #7774 - 2¼"pot - \$5.00 - green stem covered in dense erect stiff black and white spines, bright pink flower in summer, makes large clusters

T. jauernigii - #7827 - 1"plant - \$5.00 - low brownish stem from thick taproot, short black and white spines, brownish flowers in winter

*T. klinkerianus (#1) - #5609 - ¾"-1"plant - \$5.00 - low matte green stem, short corky gray-brown spines, yellowish flowers

T. klinkerianus (#2) NEW - #9670 - ¾"plant - \$5.00 - low dark green stem, short corky dark spines, whitish flowers

T. saueri ssp. gonzalezii NEW (LIMIT 5) - #9597 - 1"plant - \$6.00 - (PP1234 Rancho Chapala, Tamaulipas MEX) low green stem with dense white radial spines, large pink flower in late winter

*T. swobodae - #5754 - 1"plant - \$5.00 - low shiny green stem, sparse short brown spines, small yellow flowers

T. ysabelae HO776 - #9643 - 1"plant - \$5.00 - Tula, Tamaulipas, MX, round green stem with dense brown tipped yellow spines, white flowers in spring, this is the same batch of plants offered with the Summer 2017 update (the data for them was finally located)

Crested, Variegated, and Monstrose Cacti

G-SG = grafted on Stenocereus griseus G-HJ = grafted on Harrisia justbertii RC = rooted cutting

* = only advertised on the web site due to limited quantities

*MAMMILLARIA beneckeii (red variant) - #5755 - 3¼"potG-HJ - \$8.00 - short black spines, hooked central, large orange flowers, stems turn dark red in strong light, can be grown on its own roots but is difficult

* = only advertised on the web site due to limited quantities

ASCLEPIADS (STAPELIADS) - We are growing so many members of this group that we now list them

separately.

Disclaimer: Unfortunately many of the Stapeliads look so similar that they can only be told apart when in flower. Additionally, they hybridize readily. We do our best to make sure the plants offered are what they are supposed to be. We cannot be sure that seedlings from open pollinated seed are pure until they flower. Rooted cuttings are pretty much guaranteed to be correct.

* = only advertised on the web site due to limited quantities

HUERNIA keniensis Barad 11548 - #8969 - 2¼"potRC - \$5.00 - (Lake Naivasha, Kenya) thin green stems, ¾"-wide maroon flowers with dense teeth on petals and throat

H. keniensis ssp. nairobiensis - #9543 - 2¼"potRC - \$5.00 - green stems with some purple mottling, 1" flower sits on its side or faces down, outside of flower is maroon with lighter bands running up the petals, inside dark maroon with short teeth

MATELEA cyclophylla - #5767.3 - 1"caudex - \$8.00 - (=Gonolobus cyclophyllus) Mexican caudiciform with corky tan caudex similar in appearance to Dioscorea, vines in summer with heart-shaped leaves and green or purple flowers

*ORBEA semota ssp. orientalis NEW - #8952 - 2¼"potRC - \$5.00 - (Tanzania, Kilimanjaro Prov.) stems with long soft teeth, light purple mottling, 1" brownish-red flowers with hairs on edges

PETOPENTIA natalensis - #7659 - 3¼"pot - \$8.00 - brown-skinned teardrop shaped caudex, vining stems with long shiny dark green leaves with purple underneath

RAPHIONACME flanaganii - #6965 - 4"pot - \$10.00 - caudiciform from KwaZulu-Natal, South Africa, vining stems with slightly fuzzy green leaves from fat white root, can be raised when larger for bonsai-like display

RHYTIDOCAULON ciliatum/R. macrolobum hybrids - #9458 - 2¼"pot - \$5.00 - small seedlings, pencil-thin brown stems, small flowers mostly brownish/purple with hairy margins

STAPELIA flavopurpurea - #8456 - 2¼"pot - \$5.00 - seedlings, upright green stems with purple mottling, 1" flowers with pinkish-purple center, petals are yellowish with raised ridges, honey-like fragrance

Succulents (Other than Cacti)

ADENIUM hybrid #10 (APOCYNACEAE) - #8782 - 4"pot - \$9.00 - these seedlings are still squat with fat bases and roots, (A. crispum x A. arabicum)F2, seedlings quickly fatten and branch and eventually form the low massive caudex of A. arabicum with narrower pointed leaves, some with crisped edges and white venation, flowers are pink with red nectar guides in the throat

*A. socotranum - #9541 - 6"pot - \$35.00 - largest-growing of the genus from the isle of Socotra, in spite of this the seedlings start with low round caudex with single upright stem, they only start to thicken when larger, shiny dark green leaves, pink flowers when much larger

ADROMISCHUS cristatus NEW (CRASSULACEAE) - #5020 - 2¾"pot - \$5.00 - rosettes of plump dark green leaves with wavy ends and fuzzy skin

AGAVE guiengola 'Creme Brulee' (ASPARAGACEAE) - #9641 - 3¼"pot - \$7.00 - light green rosettes with white margins, some pink in strong light, small black teeth on margins of leaves, grows to 3 or 4 feet, will tolerate a little frost

A. stricta nana (Minas Asbestos) - #5057 - 3¼"pot - \$7.00 - rosettes of thin 8"-long gray-green leaves, clusters with age or when the main stem flowers

ALLUAUDIOPSIS fihirenensis (DIDIERIAEAE) - #9283 - 6"pot - \$15.00 - spiny upright gray stems, long thin fleshy leaves, forms sparse upright bush

ALOE 'Crosby's Prolific' (XANTHORRHOEAEAE) - #9109 - 4"pot - \$9.00 - 4"-5" rosettes from dark green leaves with some white mottling, 12"-tall spikes of orange flowers, makes nice compact clumps

A. dichotoma - #5071 - 2¾"pot - \$5.00 - one of the largest tree Aloes, plump bluish leaves with small teeth

A. 'Doran Black' - #7007 - 3¼"pot - \$7.00 - this old hybrid often sold as Dorian Black, toothy white and green leaves form 4"-6" rosettes and cluster to easily fill 8" pot

A. jucunda - #5077 - 4"pot - \$9.00 - nice clumps, small-growing species, shiny green leaves mottled with white form 3" rosettes on short stalks and cluster from the base, pink flowers on short stalks

A. 'Latte' - #9522 - 3¼"pot - \$7.00 - (K. Griffin hybrid) long brownish leaves covered with short raised ridges and teeth, forms 6" rosettes

A. 'Lizard Lips' - #7577 - 3¼"pot - \$7.00 - old hybrid, dark green and white mottled leaves form 4" upright rosettes, leaves have rough surface

A. 'Pepe' - #5070 - 2¾"pot - \$5.00 - (A. descoingsii x A. haworthioides) dwarf hybrid, short dark green leaves with soft white teeth form 2½" rosettes that can fill a 6" pot, small orange flowers

A. 'Pink Blush' - #9123 - 4"pot - \$9.00 - (K. Griffin hybrid) wide green and white leaves, raised ridges and leaf edges are pink, much of the plant will be pink in strong light

A. 'Sparkling Burgundy' - #7976 - 4"pot - \$9.00 - old hybrid, long thin green leaves blush with purple in bright light and form 6" rosettes, this batch has some dried leaf tips on outer leaves

A. zanzibarica - #5091 - 3¼"pot - \$7.00 - light green leaves mottled with white, short white teeth on margins form upright stems clustering from base, orange flowers

ALOINOPSIS malherbei (AIZOACEAE) - #7894 - 2¾"pot - \$5.00 - rosettes of flattened blue-green leaves with small white bumps on the edges and back, clear yellow flowers

A. rubrolineata - #7841 - 2¾"pot - \$5.00 - long fat pointed green leaves form a flat rosette from a thickened root, golden flowers mostly have a reddish midstripe

A. rosulata - #7665 - 2¾"pot - \$5.00 - fat soft flattened dark green leaves from thick taproot, yellow flowers with pink midstripes in spring

A. shooneesii - #7569 - 2¾"pot - \$5.00 - clusters of round green leaves will develop thick taproot, golden flowers

ANACAMPSEROS rufescens (PORTULACEAE) - #6779 - 2¾"pot - \$4.00 - loose rosettes of plump purple and green leaves, bright pink flowers in summer

A. rufescens 'Sunrise' - #5001 - 2¾"pot - \$4.00 - cultivar with smaller leaves and tighter rosettes, leaves blush pink and yellow in strong light, pink flowers in summer

BIJLIA cana NEW (AIZOACEAE) - #8236 - 2¾"pot - \$5.00 - plump gray-green leaves, yellow flowers, forms small clumps

*BURSERA fagaroides (BURSERACEAE) - #5662.4 - 4"pot - \$9.00 - stout seedlings that have been trimmed and are beginning to form a nice canopy, peeling bark, good for bonsai

CALIBANUS hookeri NEW (ASPARAGACEAE) - #6744 - 4"pot - \$9.00 - 2" caudex topped with long thin gray-green grass-like leaves, when mature the caudex develops fissured bark

CEPHALOPENTANDRA ecirrhusa (CUCURBITACEAE) - green- and silver-skinned knobby conical caudex, green leaves on short vining stems, 1" butter-yellow flowers

#6964.2 - 1" x 1"caudex - \$7.00

#6964.4 - 2½"+caudex - \$12.00

CHEIRIDOPSIS aff. pearsonii (AIZOACEAE) - #9514 - 2¾"pot - \$5.00 - Pedros Kloof, NC, South Africa, long thin fleshy bluish leaves form small clusters, clear yellow flowers

*C. denticulata - #5659 - 3¼"pot - \$7.00 - (= C. candidissima) thick soft light blue-green leaves with a tooth or two on the margins make 6" clumps in time, large pale yellow flowers

C. peculiaris - #9519 - 2¾"pot - \$5.00 - west of Steinkopf, NC, South Africa, gray-green leaves, only 2 pairs of leaves on each growing point per year, outer pair lies on the ground while inner pair stays together pointing upward, during the summer dormant period the outer pair dries up and the inner pair remains as a dry sheath to protect the plant, yellow flowers

C. pulverulenta - #9573 - 2¼"pot - \$4.00 - flowering-size dwarf species, short gray-green leaves form small clumps, slow-growing, ¾"-wide bright yellow flowers

C. purpurea - #9497 - 2¾"pot - \$5.00 - soft light green leaves a little over 1" long make low clusters, large vivid purple flowers in late winter

C. umdausensis - #9515 - 2¾"pot - \$5.00 - Umदाus, NC, South Africa, long green leaves with rough surface form nice clumps, large yellow flowers

CISSUS rotundifolia (VITACEAE) - #8085 - 4"pot - \$9.00 - 2 rooted cuttings, large elliptical green leaves with slightly scalloped edges, fast growing, eventually form dahlia-like tubers

CRASSULA falcata NEW (CRASSULACEAE) - #5207 - 2¾"pot - \$5.00 - Propeller Plant, long thick gray-green leaves, when mature produces spray of bright red flowers in winter

DUDLEYA saxosa ssp. collomiae (white) NEW (CRASSULACEAE) - #9671 - 2¾"pot - \$5.00 - Arizona native, winter-growing rosettes of long soft leaves with covering of white bloom, spikes of yellow flowers in late winter when mature

D. saxosa ssp. collumiae (green) NEW - #9672 - 2¾"pot - \$5.00 - Arizona native, from the same population as above but with shiny soft green leaves

*EUPHORBIA decaryi v. decaryi (EUPHORBIACEAE) - #5384 - 3¼"pot - \$7.00 - rough white stems topped with succulent dark green and purple wavy edged leaves, suckers from below ground and can quickly fill a pot

E. fruticosa NEW - #5391 - 3¼"potRC - \$7.00 - upright blue stems, short paired gray spines, bright yellow cyathia in the spring, we use this as a grafting stock but it can make a beautiful specimen on its own

E. genoudiana - #8374 - 4"pot - \$8.00 - Madagascan shrublet with spiny gray stems, thin green leaves, green bracts on the cyathia rather than the typical-colored ones

E. hedyotoides - #9498 - 4"pot - \$9.00 - Madagascan species, thin sparse bushy stems above ground with narrow green leaves from thick underground root, once a bit more mature the root can be raised for effect, however the root grows faster if buried

E. iharanae - #9640 - 3¼"pot - \$10.00 - Madagascan species, grows along the coast near Cap-Manambata (Iharana District), upright light green to purple stems will branch, rows of short curved brown spines on stem, large light green leaves with fuzzy feel, small yellowish cyathia

E. mammillaris variegata NEW - #5418 - 2¼"potRC - \$5.00 - rooted cuttings, upright green ¾"-thick green and white stems, forms clumps in time

E. meloformis v. macrodiscus NEW (LIMIT 3) - #8675 - 1"seedlings - \$6.00 - (ES3459 RSA, Peddie) mostly solitary low shiny green stems can have purple bands in bright light, persistent tan flower stems, sexes on separate plants (these are unsexed)

**E. millotii* - #9558 - 4"pot - \$8.00 - Madagascan species, finger-thick upright gray stems topped with large shiny green leaves, branches to form small shrublet, light green to pinkish cyathia

E. obesa - 1½"seedlings, Basketball Plant, almost extinct in habitat but common in cultivation, round green body becomes columnar with age, sexes on separate plants, which sometimes switch

female plants - #5672 - \$5.00

male plants - #5673 - \$5.00

E. obesa hybrid #1 NEW - #6903 - 2¼"pot - \$4.00 - 1"-thick upright light green stems offset heavily when larger, used as a grafting stock for years

E. obesa hybrid #2 NEW - #9675 - 2¼"pot - \$4.00 - 1½"-thick round green stems, makes pretty clumps in time, makes a good grafting stock

**E. poissonii* - #9559 - 4"pot - \$25.00 - rare species, stem turns white when mature with small paired spines, large green leaves during the summer

E. stellata - #8867 - 3¼"pot - \$7.00 - thick taproot with dark green flat arms with short paired brown spines on edges, light green bands on stems color to purple in bright light

E. suzannae NEW (LIMIT 10) - #6796 - 2¼"pot - \$5.00 - seedling with round green stems covered with soft tubercles, sexes on separate plants (these are unsexed), makes nice clusters in time

E. symmetrica NEW (LIMIT 5) - #6795 - 1"seedlings - \$6.00 - low round stems with slightly depressed ribs, smoother than *E. obesa* and with 3 cyathia per node when mature, can cluster when mature, sexes on separate plants (these are unsexed)

**FAUCARIA candida* (AIZOACEAE) - #8743 - 2¾"pot - \$5.00 - paired fleshy leaves with soft teeth on margins form low clusters, unlike most of the "jaw" plants this species has white flowers

*F. tuberculosa (Japanese Line) - #8514 - 2¾"pot - \$5.00 - paired fleshy green leaves with teeth at margins, bred to form carbuncle-like growths at the base of the leaves, large yellow flowers

FENESTRARIA rhopalophylla (AIZOACEAE) - #6951 - 2¾"pot - \$5.00 - Baby Toes, plump upright leaves with windowed tips, flowers will either be yellow or white, this batch hasn't flowered yet

FICUS petiolaris NEW (MORACEAE) - #5678 - 3¼"pot - \$8.00 - Rock Fig, dark green heart-shaped leaves with red veins, swelling yellow-barked base can be planted over a rock for effect, will drop its leaves if kept too dry

FOUQUIERIA diguettii (FOUQUIERIACEAE) - #9490 - 3¼"pot - \$7.00 - seedlings of this widespread Ocotillo relative from Southern Baja, coastal Sonora, and coastal Sinaloa, makes large spiny bush, red flowers

F. formosa - #9652 - 3¼"pot - \$8.00 - tree Ocotillo from central to southern Mexico, green-brown stems with shiny dark green leaves

F. macdougallii - #7898.3 - 3¼"pot - \$7.00 - Tree Ocotillo from Sonora Mex, brown and green bark, light green leaves, sprays of red flowers when mature

F. purpusii - #8680 - 18"-24"tall with ¾"-1"-thick caudex - \$35.00 - from Oaxaca MX, conical green and red-brown caudex, grows to 15' tall, narrow green leaves

xGASTERALOE 'Green Ice' (XANTHORRHOEACEAE) - #9188 - 3¼"pot - \$7.00 - pretty hybrid of Aloe variegata and Gasteria, chunky upright leaves mottled green and gray-green, rosettes can grow to 6" or more and clusters can fill an 8" pot

xG. 'Nice Try' - #9481 - 3¼"pot - \$7.00 - (Aloe 'Sean's Red' x Gasteria glomerata) long fat green leaves with a touch of red when grown in bright light, 4"-5" rosettes cluster to fill 8" pots

GASTERIA baylissiana (XANTHORRHOEACEAE) - #8267 - 2¾"pot - \$5.00 - thick green leaves covered with rough raised gray bumps, spikes of nice orange flowers, make nice clusters

G. ellaphieae - #8096 - 2¾"pot - \$5.00 - rooted offsets, thick dark green leaves mottled with raised silvery bumps

G. glomerata - #9271 - 2¾"pot - \$5.00 - rooted offsets from nice bluish clones, fat blue-green leaves will cluster heavily, bright orange flowers

G. liliputana - #7068 - 2¾"pot - \$5.00 - smallest species, short dark green and white mottled leaves, clusters heavily, spikes of pink and white flowers

*G. 'Polliwog' - #9567 - 2¾"pot - \$5.00 - G. armstrongii hybrid, shiny dark green leaves, compact growth, makes nice clumps somewhat slowly

G. 'Sakura Fuji' NEW - #9276 - 2¼"pot - \$5.00 - thick white and green leaves, makes nice clusters

G. 'Silver Fuji' - #9150 - 2¾"pot - \$5.00 - thick silvery gray-green leaves sometimes with a bit of purple, occasionally throws a normal offset

GRAPTOPETALUM bellum NEW (CRASSULACEAE) - #5667 - 2¼"pot - \$4.00 - low green rosettes cluster sparingly when mature, bright pink flowers in spring

G. rusbyi - #9535 - 3¼"pot - \$7.00 - Arizona native, rosettes of green leaves cluster to fill 6" pots, branching stalks bear flowers speckled with red

HAWORTHIA attenuata 'Hakucho' NEW (XANTHORRHOACEAE) - #8371 - 2¾"pot - \$5.00 - thin green leaves with faint yellow striping, raised white bumps, makes large clusters

H. coarctata v. *coarctata* NEW - #7114 - 2¾"pot - \$5.00 - 1"+ thick stems of short dark green, curved claw-like leaves with raised white dots, makes nice clumps

H. decipiens - #9474 - 3¼"pot - \$7.00 - pretty sure the name is correct, rarely offsets and grows to 4" wide, light green leaves with pointed windowed tips, dense soft spines on edges

H. 'Manda's hybrid' - #7179 - 2¾"pot - \$5.00 - bright green pointed leaves make 2½"-wide rosettes, makes 6" clusters with time

H. maughanii x. *H. truncata* - #7139 - 2¾"pot - \$5.00 - old hybrid, rough windowed leaves are brown in high light, forms nice clusters

H. resendeana - #7153 - 2¾"pot - \$5.00 - short stout pointed dark green leaves form upright stems that will cluster from the base

H. retusa fma. *geraldii* NEW - #7157 - 2¾"pot - \$5.00 - heavy dark green leaves with flat windowed top, makes large clusters

**H. retusa* v. *acuminata* - #7158 - 3¼"pot - \$7.00 - thick triangular windowed green leaves form rosettes up to 3", clusters slowly

IBERVILLEA sonora "peninsulae" NEW (CUCURBITACEAE) - #7191.2 - 2¼"pot - \$4.00 - this line originally from Baja, CA, forms conical caudex, vining stems with heart-shaped rough light green leaves, sexes on separate plants, small yellow flowers, red fruit

IHLENFELDITA vanzijlii (AIZOACEAE) - #8442 - 2¼"pot - \$4.00 - (=Cheiridopsis vanzijlii) soft upright paired gray-green leaves with blush of purple, forms small clusters, bright yellow flowers in spring

JACARATIA corumbensis (CARICACEAE) - #5828 - 4"pot - \$9.00 - caudiciform papaya, forms a bush or small tree with brown bark, thick roots can be raised, shiny green leaves, sexes on separate plants, odd inedible fruit on female plants

KALANCHOE synsepala #2 (CRASSULACEAE) - #9302 - 3¼"pot - \$7.00 - gray-green leaves with wavy toothed edges

LITHOPS bromfieldii v. *bromfieldii* - #4733 - ¾"-1"plant - \$2.50 - brown to tan body, red-brown broken windows on top

L. bromfieldii v. *bromfieldii* (Upington) - #8533 - ¾"-1"plant - \$2.50 - brown body, fine darker markings on top

L. bromfieldii v. *insularis* - #7734 - ½"plant - \$2.50 - brown body, brown top with darker brown markings

L. dinteri ssp. *frederici* - #8072 - ¾"-1"plant - \$2.50 - yellow to tan body, tan top with few red dots

L. helmutii - #4745 - ¾"-1"plant - \$2.50 - upright gray-green leaves with darker green mottled tips

L. hookeri v. *elephina* - #9253 - ¾"-1"plant - \$2.50 - purplish-gray body, darker markings on top

L. hookeri v. *lutea* - #8677 - 1"plant - \$2.50 - gray body, orange top with rusty red lines

L. julii ssp. *julii* C297 - #8574 - ¾"-1"plant - \$2.50 - whitish body, gray markings on top with broken darker line where the leaves meet

L. karasmontana "*mickbergensis*" - #6884 - ¾"-1"plant - \$2.50 - light tan body, sparse dark brown markings on top

L. karasmontana "*signalberg form*" - #8271 - ¾"-1"plant - \$2.50 - tan body, tan top with a few dark brown markings

L. karasmontana v. *lericheana* - #7214 - ¾"-1"plant - \$2.50 - tan body, brownish somewhat clear window on top

L. localis - #8703 - ½"plant - \$2.50 - dark grayish body, top densely speckled with tiny olive dots

L. marmorata "*framesii*" - #9576 - ¾"-1"plant - \$2.50 - light gray-green body, green and white top

L. salicola - #7224 - ½"-¾"plant - \$2.50 - dark gray body, olive green top with some gray flecks

L. schwantesii v. *rugosa* - #9594 - ¾"-1"plant - \$2.50 - gray body, gray top with dark reddish markings

MARLOTHISTELLA *stenophylla* NEW (AIZOACEAE) - #9067 - 2¾"pot - \$5.00 - clusters of long thin soft light green leaves, pink flowers in winter

MATELEA *cyclophylla* (APOCYNACEAE) #5767.3 - 1"+caudex - \$8.00 - (=Gonolobus *cyclophyllus*) Mexican caudiciform with corky tan caudex similar in appearance to *Dioscorea*, vines in summer with heart-shaped leaves and green or purple flowers

MOMORDICA *rostrata* (CUCURBITACEAE) - conical green and white caudex eventually becomes fat and pleated, long thin annual vines with dark green leaves and small yellow flowers, sexes on separate plants

#5746.2 - 2¾"pot - \$5.00

#5746.4 - 4"pot - \$12.00 - caudex about 2" wide x 3" tall

NANANTHUS *margaretifera* (MESEMBRYANTHEMACEAE) - #9574 - 2"pot - \$5.00 - rosettes of thick long pointed leaves with whitish dots, small golden flowers, forms thick taproot

OECEOCLADES *calcarata* (ORCHIDACEAE) - #9331 - 6"pot - \$20.00 - Madagascar, terrestrial orchid with long shiny dark green leaves atop fat pseudobulb, short spike of green flowers with pink and white at very center, plants with two or more pseudobulbs

PACHYCORMUS *discolor* (ANACARDIACEAE) - #5661 - 3¼"pot - \$7.00 - Elephant Tree from Baja, CA, winter grower with green leaves, peeling white bark when mature, thick root when young, can be trained as bonsai

PACHYPODIUM *saundersii* (APOCYNACEAE) - #5741 - 3¼"pot - \$7.00 - caudiciform from southeastern Africa, silvery stem with shiny green leaves in summer, white flowers in fall, can form a large caudex in time

P. succulentum - #7445 - 5"pot - \$10.00 - pencil-thick green stem from thick carrot-like taproot, long narrow green leaves, small brown spines, large pink flowers, just flowering size

PELARGONIUM appendiculatum NEW (GERANIACEAE) - #8726 - 2¾"pot - \$4.00 - winter-growing species dies back to underground corm in summer, lacy light green leaves in winter, white flowers in later spring before it goes dormant

PETOPENTIA natalensis (APOCYNACEAE) - #7659 - 3¼"pot - \$8.00 - brown-skinned teardrop-shaped caudex, vining stems with long shiny dark green leaves with purple underneath

PLEIOSPILOS bolusii (AIZOACEAE) - #7462 - 2¾"pot - \$5.00 - fat paired green leaves with minute dots, somewhat bumpy surface, large orange and yellow flowers with coconut scent

P. simulans - #8103 - 2¾"pot - \$5.00 - fat leaves that open widely lying on the ground, large orange and yellow flowers with coconut scent

RAPHIONACME flanaganii (APOCYNACEAE) - #6965 - 4"pot - \$10.00 - caudiciform from KwaZulu-Natal, South Africa, vining stems with slightly fuzzy green leaves from fat white root, can be raised when larger for bonsai-like display

SANSEVIERIA singularis (ASPARAGACEAE) - #6881 - 6"pot - \$15.00 - 1"-thick upright leaves with round cross-section eventually grow to 2' tall

SARCOCAULON herrei (GERANIACEAE) - #8338 - 2¾"pot - \$7.00 - green stems with spiny persistent leaf bases, heavily dissected light green leaves, yellow-white 5-petalled flowers

TITANOPSIS aff. calcareum (AIZOACEAE) - #8499 - 2¾"pot - \$5.00 - (Ghams, Upington) blue leaves with triangular warty tips form low rosettes

T. calcareum - #9296 - 2¾"pot - \$5.00 - (35 km NW Brandvlei) low rosette of light blue leaves with warty orangish tips

T. hugo-schlechteri - #7531 - 2¼"pot - \$5.00 - low rosettes of light blue leaves with bumpy orangish tips, light orangish flower

UNCARINA roeoesliana (PEDALIACEAE) - #7798.3 - 3¼"pot - \$8.00 - smallest of the genus, green fuzzy leaves from short upright stem, thick root can be raised eventually, yellow flowers with thin purple lines in throat, already flowering size, odd fruits with hooked spines

U. decaryi - #9095.4 - 4"pot - \$9.00 - upright stems from thick root, large dark green leaves, lighter underneath, dark yellow flower with purple throat, also sold as U. peltata

Miscellaneous Items

BOOKS

The Complete Illustrated Guide to Growing Cacti & Succulents by Miles Anderson NEW - #6156 - \$15.00 - Out of Print incarnation of Miles' book, soft cover, 6½" x 8¾", 256 pages, 700 photographs and 400 varieties covered, signed by the author

GROWING the MESEMBS by Ed Storms - #8105 - \$6.50 - including group photos of most varieties of Lithops - good beginners' book on the Mesembryanthemaceae with valuable care instructions on many of the genera - 6" x 9", 58 pages, soft cover, ~50 color photographs

Pachyforms - A Guide to Growing PACHYCAUL AND CAUDICIFORM PLANTS by Philippe de Vosjoli - #6159 - \$35.00 - One of the few books dedicated to this group of plants, care information and photos of many of the species in cultivation, 7" x 10", 319 pages, 392 photographs, soft cover, in original shrink wrap

MUGS

Caudicipline Coffee Mug - #6119 - \$5.00 - We finally produced another run of this mug, tongue-in-cheek humor: on one side a Botanatrix in her gardening regalia trains a bonsai, on the other "Caudicipline... Raise 'em up & Beat 'em down!"

TOOLS

HEMOSTATS - stainless steel clamps with long locking jaws

10" hemostat (Straight) - #6120.0 - \$6.00 - for more delicate weeding, moving small pots, pushing labels

10" hemostat (Curved) - #6121.0 - \$6.00 - same as 10" straight but with curved jaws

12" hemostat (Straight) - #6120.2 - \$8.00 - Thicker-made than 10", can pick up 8" plastic potted plants

12" hemostat (Curved) - #6121.2 - \$8.00 - same as 12" straight but with curved jaws

16" hemostat (Straight) - #6120.6 - \$12.00 - Very heavy duty, I use them to pull weeds in the garden

16" hemostat (Curved) - #6121.6 - \$12.00 - same as 16" straight but with curved jaws

6" DENTAL LOCKING TWEEZERS - These have fairly fine tips with a locking mechanism built in

6" dental locking tweezer, straight - #6102 - \$2.20

6" dental locking tweezers, curved - #6103 - \$2.20 - 45 degree bend in last ½" or so

FORCEPS - Tweezers by any other name

5½" forceps - #6100.5 - \$1.75 - stainless steel tweezers, fairly blunt tips

8" forceps - #6100.8 - \$2.25 - stainless steel tweezers

10" forceps - #6101 - \$2.75 - stainless steel tweezers

12" forceps - #6101.2 - \$3.25 - stainless steel tweezers

4Pc Set - #6101.5 - \$9.00 - Set with one of each of the above sizes (5½, 8, 10, 12) SAVE \$1.00

Magnifying Tweezers - #6124 - \$5.00 - sharp 4½" tweezers, 1¼" magnifying glass, nicer than the old version

Uncle Bill's Sliver Gripper (in tube) - #6106 - \$7.00 - small tweezers come in metal capped clear plastic tube, very precise and handy
